

Convolution Brother's Artist Statement:

The CONVOLUTION BROTHERS are Miller Puckette (cbro#0), Cort Lippe (cbro#1), and Zack Settel (cbro#2). The easy PD programming is by Zack, and the alternate controller design is by Cort, while anything that is challenging and/or vaguely resembles art or science is by Miller. The three of them have appeared in concert in Paris, Japan, and the USA, as well as worldwide via live internet broadcast sponsored by Canal+, a prominent Paris TV station.

Cort met Zack and Miller in Paris, while Zack met Miller at MIT. Although all are originally from the USA, their common connection is [IRCAM](#), the *Institut de recherche et coordination acoustique/musique* located in Paris, where they worked as researchers/composers at various times. Zack was prominent in the development of the ISPW, while Cort is currently working as Associate Professor of Music at the University at Buffalo, and Miller is Professor of Music at UCSD. Zack is now a Prof. too at the University of Montreal. Look up Miller on the web. Don't bother with Cort and Zack since it has all been downhill since the IRCAM days.
